ABOUT ME

Software Developer and Designer with nearly 2.5 years of experience in the Telecom domain, specializing in Java Full stack using STRUTS, spring MVC and REST architecture. Have hands-on experience for implementation of new features, redesigning of existing applications, to improve scalability and efficiency. A keen self-learning attitude, staying abreast with latest technologies like ChatGPT, CoPilot, Python and GenAI.

EDUCATION

FUTURE INSTITUTE OF ENGINEERING AND MANAGEMENT

Bachelor of Technology
(BTech)

2018 – 2022

SKILLS

- Java Spring, Spring MVC, SPRING REST API, Core, Servlets, Apache Tomcat
- JSP, HTML, CSS
- React JS Fundamentals
- Python
- AWS Cloud Fundamentals

RECOGNITIONS

Recognized as
Key Contributor by
Customer in 2024

WORK EXPERIENCE

ERICSSON INDIA PVT. LTD

Software Developer (OCT'22 – Present)

- Designed and implemented Pagination and sorting mechanism for numerous SPRING and SPRING REST pages containing AJAX tables.
- Achieved optimization of Webpages which reduced loading time by ~60%.
- Migrated entire application from STRUTS to SPRING MVC and then moved it to Spring REST architecture.
- Reduced code base by ~35% by redesigning existing code structure, making it scalable and modularizing it to become platform independent. This decreased webpage load time by ~20%.

COGNIZANT TECHNOLOGY SOLUTIONS

Software Developer intern (March'22 – June'22)

- Development of ETL pipelines using PowerCenter Informatica

OTHER EXPERIENCE

- Developed Influential User Identification for Twitter (now X) using machine learning algorithm influenced by COVID pandemic, using spread forecast algorithm by using Tweepy Module, Twitter API and Python.
